

NAGRA SCOUT SHIELD

Foundational Subscriber Protection

Safeguard subscribers with foundational cyber defense powered by NAGRA Scout threat intelligence.

In an increasingly connected world, subscribers expect protection that is effective, easy to use and always available. NAGRA Scout Shield helps operators rapidly deploy a trusted digital protection service that safeguards subscribers against phishing, malware, scams and unsafe browsing. Powered by NAGRA Scout threat intelligence and supported by AI-assisted experiences, NAGRA Scout Shield helps build trust, strengthen loyalty and create value beyond connectivity.

NAGRA Scout Synthesis helps operators understand service adoption, improve engagement and identify opportunities to grow customer value.

Additionally, NAGRA Scout supports operators in fulfilling the requirements of Regulation (EU) 2024/2847 Cyber Resilience Act (CRA), aligning your operations with EU standards.

Solution Benefits

- 1 Essential Protection:** Deliver foundational protection against phishing, malware, scams and unsafe browsing while helping subscribers navigate digital life with confidence.
- 2 Proactive Defense:** Provide always-on protection powered by NAGRA Scout threat intelligence to help reduce exposure to phishing, malware, scams and emerging digital threats.
- 3 Empower Subscribers:** Give subscribers an intuitive, AI-assisted app experience that makes digital protection easier to understand and manage.
- 4 Effortless Integration:** Deploy subscriber protection rapidly through public cloud infrastructure without adding complexity for operators or subscribers.
- 5 On-the-Go Protection:** Extend digital protection beyond the home to help protect subscribers across everyday online activities and public networks.

Protect Against Everyday Digital Threats.

Identify

Device Categorization: Recognize and categorize connected devices to improve visibility, support policy management and create safer digital experiences.

Protect

Safe Browsing & Scam Protection: Block phishing, malware, scams and harmful websites to support safer everyday browsing.

Personal Data Exposure Monitoring: Alert subscribers when personal information may have been exposed online and support action to help protect accounts, identity and privacy.

Filter

Content Filtering: Apply customizable category-based filtering to help block inappropriate or harmful content.

Internet Access Control: Pause or schedule internet access to help families manage online activity and screen time.

Troubleshoot

Service Optimization: Help diagnose and improve the performance of popular digital services while reducing support friction.

How It Works

NAGRA Scout Shield combines threat intelligence, subscriber protection and AI-assisted experiences in a simple, scalable service that operators can deploy quickly. NAGRA Scout Shield helps protect against phishing, malware, scams and unsafe browsing while giving subscribers greater confidence across their digital lives.

Operators benefit from rapid deployment, reduced support pressure and service insights that help improve engagement and identify opportunities for growth.

Personal Data Exposure Monitoring
Help subscribers stay informed when personal information may have been exposed online, with alerts and guidance designed to support account, identity and privacy protection.

Protection Capabilities

Protect against phishing, malware, scams and unsafe browsing.

Categorize connected devices.

Monitor personal data exposure and privacy risks.

Support parental controls and content filtering.

Enable internet access controls and family management.

Create Value Beyond Connectivity

Launch a subscriber protection service quickly and efficiently.

Differentiate broadband services with visible digital protection.

Increase subscriber trust and long-term loyalty.

Reduce support pressure through AI-assisted app experience.

Create value beyond connectivity.
