FACTSHEET

NAGRA SCOUT THREAT INTELLIGENCE

Turn Security Threats into Actionable Intelligence

Build, enhance and scale cybersecurity services using the same intelligence that powers NAGRA Scout.

NAGRA Scout Threat Intelligence underpins the NAGRA Scout portfolio, providing the visibility and context needed to identify, assess and respond to evolving threats. It combines threat intelligence for safe browsing services with categorization, filtering, parental-control and policy-enforcement intelligence to identify unsafe destinations, phishing and malware risks, and enable category-based digital protection services.

Solution Benefits

1. **Foundational Intelligence:** Power consumer cybersecurity services with a powerful threat and categorisation intelligence to identify unsafe destinations, phishing and malware risks, and category-based policy needs.
2. **Operator-Built Services:** Build or enhance cybersecurity services, while keeping control of your customer experience, service proposition and route to market.
3. **Flexible Integration:** Access NAGRA Scout Threat Intelligence through delivery models that fit operator and partner environments, without replacing existing platforms, customer experiences or service models.
4. **Service Enablement:** Support safe browsing, content filtering, parental controls and policy enforcement with intelligence designed for operator and partner-led digital protection services.
5. **Path to Protection:** Extend into NAGRA Scout Shield, Defense or Defense Pro for ready-made protection services, while NAGRA Scout Synthesis helps optimise performance, engagement and growth.

Build Trust with NAGRA Scout Threat Intelligence

Build

Power Your Own Service: Integrate NAGRA Scout Threat Intelligence into existing operator or partner cybersecurity services.

Protect

Enable Safer Decisions: Support safe browsing services, category filtering and policy enforcement with actionable threat and categorization intelligence.

Extend

Grow with NAGRA Scout: Extend from threat intelligence to subscriber protection through NAGRA Scout Shield, NAGRA Scout Defense and NAGRA Scout Defense Pro.

How It Works

NAGRA Scout Threat Intelligence continuously identifies unsafe destinations, phishing risks, malware indicators and categorization signals that help inform cybersecurity decisions.

The intelligence powers NAGRA Scout protection services while also being available through flexible integration models for operators and partners building their own cybersecurity capabilities.

NAGRA Scout Threat Intelligence Capabilities

- **Threat intelligence:** Identify unsafe destinations, phishing, malware, residential proxies servers and digital risk indicators.
- **Categorization intelligence:** Supports content classification for filtering, parental controls and policy enforcement.
- **Flexible delivery:** Provides NAGRA Scout Threat Intelligence through integration models and protocols that fit operator and partner needs.
- **Service-ready intelligence:** Supports both operator-built cybersecurity services and ready-made NAGRA Scout protection routes.
- **Destination intelligence:** Supports identification of malicious, suspicious or inappropriate destinations before users connect.
- **Partner-ready delivery:** Fits operator, partner and ecosystem-led cybersecurity service models.

Build Services on Proven Intelligence

- Build cybersecurity services using proven intelligence.
- Enhance existing protection platforms and customer experiences.
- Support filtering, policy enforcement and safe browsing services.
- Integrate intelligence without replacing existing systems.
- Extend into the broader NAGRA Scout portfolio when required.
